MUSTAFA BERKE ŞİMŞEKLER

Creative Developer | Game Artist | Frontend & Roblox

Ankara, Turkey · simseklermustafaberke@gmail.com · github.com/ragno-typhojem · linkedin.com/in/mustafa-berke-simsekler

PROFILE

Creative developer and METU CEIT student working across Roblox gameplay and interface systems, game art, and educational software. Recent work includes a Game Artist internship at MagicLab, ongoing software development for İLKYAR, and browser-based tools for workshops and event planning.

SKILLS

Game development: Roblox Studio, Luau, gameplay systems, multiplayer, CFrame / Motor6D, inverse kinematics, animation, custom physics

Web and software: JavaScript, TypeScript, React, HTML, CSS, Firebase, responsive interfaces, Git, GitHub, Vercel

Art and interaction: 3D modelling, Blender, UI/UX, visual design, interaction design, Figma-oriented implementation

Interactive technology: MediaPipe, TensorFlow.js, Web Speech API, LLM/TTS integration, Arduino

EXPERIENCE

Game Artist Intern | MagicLab Game Technologies **2026**

- Worked with a three-person team on game visuals, asset production, and art direction in a mobile-game studio setting.

Full Stack Engineer | İLKYAR Foundation **Nov 2024 – Present**

- Develop and quality-test software for educational projects and field activities; provide technical and hardware support during volunteer programs.
- Build interactive browser activities for children, including speech and computer-vision experiences.

Founder / Lead Developer | Ragno Games · Roblox **2023 – Present**

- Develop Roblox games and prototypes across gameplay, UI/UX, 3D assets, animation, visual polish, and optimization.

Board Chairman | METU Computer Club **2025 – 2026**

- Coordinated the board, partnerships, and student events, including the two-day Bilişim Günü program.

SELECTED PROJECTS

ProKordi Manager 2026

- Event-planning tool for schedules, name badges, collages, and minutes. Supports spreadsheet import and manual or assisted schedule editing.

B.A.L.K.I.Z · Turkish speech assistant Dec 2025

- Built a Turkish conversational assistant for İLKYAR activities, combining speech interaction, LLM/TTS services, and a child-friendly web interface.

İskelet Fehmi · motion tracking Apr 2026 – Present

- Created a MediaPipe-based browser experience that turns live body movement into an approachable character for AI education workshops.

Roblox gameplay systems Ongoing

- R15 weapon framework with IK and procedural animation; Euphoria parkour and movement physics; KICKVANE arcade football; Hustle Rush team-play systems and UI.

KODKIT · block programming 2025

- Adapted Scratch-based programming activities for İLKYAR robotics workshops using Pinoo/Minoo kits.

Monica Bot · Luau developer tool Jan 2025 – Present

- Built an AI-assisted development tool for Roblox/Luau gameplay, UI patterns, debugging, optimization, and data-management guidance.

EDUCATION AND ADDITIONAL WORK

B.Sc. Computer Education and Instructional Technology | Middle East Technical University (METU) | 2022 – 2027 expected

Volunteer technical advisor and course assistant; contributed to department orientation and educational events.

Languages: Turkish (native), English (professional working), Russian (limited working), Kyrgyz (beginner).
